COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

The Examiner indicates:

The closest prior art is Wardle (US Pat. No. 4,806,613). They teach the steps of *Dissolving, End-Capping, Linking, and Blending*; however, the reference is deficient in that it does not teach:

- (a) the step of azeotropic distillation, and
- (b) the use of a non-halogenated solvent.

He only describes the use of a *suitable solvent* in the "End-Capping" step, and uses methylene chloride in the working examples. Although a non-halogenated solvent *could have* been used as a *suitable solvent*, the prior art provides no motivation to do so. The prior art fails to establish that non-halogenated solvents are recognized in the art as suitable solvents for each step in this type of reaction process.

Applicants concur with the reasons as stated by the Examiner insofar as they comprise a summary and are exemplary and not limiting. However, as discussed in Applicants' response mailed on December 7, 2004, many of the allowed dependent claims include other and further features and elements. Accordingly, the scope of the claims must be determined from the literal language of each as a whole, as well as equivalents thereof.
